-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Torpey (5,801,727).

Torpey teaches an inkjet head comprising:

Claim 1:

- a manifold that is molded from a polymer that includes at least one thermally conductive filler material (figure 1, teaches chamber/manifold 16 that is made of ceramic, column 3, lines 50-52; the limitation of a molded manifold does not render patentable weight since this is an apparatus claim, therefore it does not matter how the apparatus was made or manufactured. In brief, that molded limitation does not have any structure.)
- a fluid ejector die module attached to the manifold (figure 1, nozzle module 18 is attached to chamber 16)

Claim 8:

- filler material is ceramic (column 3, lines 50-52)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-7, 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Torpey.

Torpey teaches all claimed features of the invention except for the various types of filler materials as claimed.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize different types of materials since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use for the purpose of achieving maximum designs. In re Leshin, 125, USPQ 416.

Allowable Subject Matter

Claims 2 and 12-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1-13 have been considered but are moot in view of the new ground(s) of rejection.
